

I have already learned:

- How to sort and group objects in different ways
- How to identify what makes groups of objects similar or different
- How to label groups
- How to order groups of objects

Q Careers in data x

Machine Learning Engineer

Teaching computers how to perform different tasks so that they can do them without human input

Vocabulary

KNOWLEDGE GEMS

I am going to learn:

- To create questions with yes or no answers
- To select attributes to sort objects into groups
- To sort objects into a tree structure using yes/no questions
- To create a digital branching database
- To test and improve my branching database
- To compare two branching databases
- To suggest uses for branching databases in the real world

**Outcome:**

To create a database that will help someone identify types of dinosaur

<b>data</b>	A piece of information that has been collected for a purpose
<b>collection</b>	A group of objects or pieces of data which have some shared attributes
<b>attribute</b>	A word or a phrase that can be used to describe an object such as its colour, size, or price
<b>seperate</b>	To split something into groups
<b>organise</b>	To order or group things according to different attributes
<b>branching</b>	Like the branches of a tree, each branch splits off and becomes smaller, narrowing down the information
<b>database</b>	An organised collection of data

How computers work and how they are made.

How to use computers to create digital content.

How to be safe and responsible on computers.

Which strands of computing have you been learning about today?

## Building Blocks to E-Safety

### E-Safety Tips

- Be careful when handling personal data - both your own and other people's. Make sure it is kept secure and not shared with anyone
- Make sure that sensitive information is protected by a strong password, and that that password is also stored securely, not written down somewhere anyone could find it
- When deciding on attributes you can use to sort people, make sure the categories you choose are sensible and unlikely to hurt anyone's feelings

## Useful Links
